I already primed Ex. 6 Personal Privacy (PP) that the SDS might need to be updated, so let her know ASAP if there are hazards to add from the final HH assessment.

And so glad this case is moving!!!!

We will be on the lookout today for this case from RAD.

The Fate and Ecotox reports were updated in June. This case, like many others, has been on the RAD priority list since July (priority 3 in July and priority 1 since August). Has not been enough bandwidth in RAD to do all the assessments, including this one. Cases get elevated when I get "angry" calls. I guess that [redacted] called you on this one.

It is now on list; I got an angry call; company has been told since March 'will be done this month'...no good reason not done as far as I can tell.

[redacted] was working on this. That is why [redacted] has looked at it. He is mentoring her.

I don't believe this was on our surge list. That is why there are no recent updates- we concentrated efforts (of all disciplines) on those. CCD has had our list for some time. As PMs notice their cases aren't included they are elevating. I act on those [redacted] flags, this included.

I am happy to meet with you today to discuss the case flow for surge cases.

I have asked [redacted] to complete this today...

Something not right about the RAD case flow; this case is in !RAD folder and seems to look like [redacted] might have looked at it once, but it is just sitting there??? It has to be done TODAY, so if [redacted] finds that other reports need updating (they were done in June most recently; don't know why wasn't finished then??
